The Portuguese CSEAR (Centre for Social and Environmental Accounting Research) Conference aims to foster a supportive and inclusive community of emerging and established scholars investigating research on the social and environmental aspects of accounting theory and practice. The annual CSEAR Conference provides an international forum to showcase research work and to foster interdisciplinary research in accounting.

The Higher Institute for Accountancy and Administration of Aveiro University looks forward to welcoming you to the 9th GECAMB (Conference on Environmental Management and Accounting) to be held at the University of Aveiro, **on the 4th and 5th of November 2022**, on a virtual format.

Although there have been situations of loss of faith in business information, greater opportunities can derive from technology and big data. In fact, the need to ensure the organization, as well as the planet sustainability, makes transparency and accountability issues crucial for environmental management and accounting.

In this context, the conference theme is: *“Modernization and Accountability in Social and Environmental Management and Accounting”*.

The Conference will provide a space for academic discussion of social and environmental accounting issues by giving participants the opportunity to share emerging and advanced topics that seek to explore contemporary accounting practices and concepts including but not limited to measurement, accountability, transparency and governance, ethics, assurance, extended external reporting, modern slavery and cybersecurity.

The Plenary Speakers include: Professor Massimo Contrafatto, University of Bergamo, Italy; Professor Enrique Bonson, University of Huelva, Spain; Professor Teresa Eugénio, Polytechnic Institute of Leiria, Portugal.

Dates to remember:

July 18, 2022 – Submission deadline for Full Papers. Submit your paper using CMT Platform.

September 19, 2022 – Response to authors

October 10, 2022 – Registration deadline for authors
